

## **Autodesk Navisworks for Project Managers Training**

Course Length: ½ day

The Autodesk® Navisworks Manage® software platform is a comprehensive Construction Coordination package. In this course we will walk through the basic tools in Navisworks for navigating, taking measurements, creating Views, producing markups and annotation in Coordination models. This course is intended for AEC management and / or professionals who simply need a cursory review of the capabilities in Navisworks.

### **Topics Covered**

Upon completion of the course, students will be able to:

- Utilise the varying Navigation tools in Navisworks
- Implement the Measurement tools to inform design change decisions
- Create and share Viewpoints for Design review
- Employ the Markup and Annotation tools to collaborate with team members
- Utilise Visibility and Display settings / options

### **Prerequisites**

Experience in native CAD application; i.e. AutoCAD or Revit experience is recommended
